No.	Features Description	Status	Comments
1	The system shall allow users to compare multiple stocks.	Not Completed	Comparison UI exists, backend not done.
2	The system shall calculate taxes (STCG/LTCG).	Not Completed	No tax logic implemented.
3	The system shall allow filtering stocks using different criteria.	Not Completed	Filters not implemented.
4	The system should provide AI insights	Partially Completed	AI provides insights only when the user asks through the chatbot; it does not generate insights automatically.
5	AI insights should appear only if the user enables them in the Data & Privacy settings.	Partially completed	Backend is implemented, but the AI insights appears on the dashboard even without user permission.
6	User can switch to Light mode	Not Completed	No Light mode implemented.
7	User can switch between simple dashboard layout and detailed dashboard layout	Not completed	No detailed dashboard layout implemented
